Filtering looks at all fields and it is case-sensitive.

Saving filters:

Filters can be permanently saved as a view and can include expressions such as ranges.

Filtering can be adjusted by using powerful filter characters. Some of them are:

@ Case-insensitive

? One unknown character

E.g. **Hans?n** looks for text such as Hansen or Hanson

.. An exact character match

E.g. **'man'** looks for an exact character match

***** Indefinite unknown characters

E.g. ***Co*** looks for text that contains "Co" and is case-sensitive

<> Not equal to

E.g. **<>0** looks for all numbers except 0

| Either/or

E.g. **1200|1300** looks for numbers with 1200 or 1300

.. Interval

E.g. **22..24** looks for the dates from the 22nd to the 24th of the current calendar month; **P8..** looks for information for accounting period 8 and thereafter

Filter tokens:

E.g. **%mycustomers** looks for customers in the **My Customers** page on your Role Centre.

Calculated data tokens:

You can use expressions to add/subtract days/weeks/month/years. E.g. **-1Y** means a year ago.

Combined format expressions:

You can combine these filter characters. E.g. **5599|8100..8490** includes any records with the number 5599 or a number from the interval 8100 through 8490.
